

Uncle Joe 2020

Lead by example

Running for 2020 is not about winning, it is about presenting constructive, alternative (better) solutions that our country needs to hear, and it is about inspiring other leaders / next generation of politicians to do something and have their voice heard as Uncle Joe exemplifies through action.

Bring back sensibility

The positions taken by current Democratic candidates are too radical – full of empty promises and unrealistic proposals to grab attention. People from conservative Asian cultures start to look at our democratic election as a joke or some sort of reality TV drama. We need experienced politicians to bring back some good sense back. Democratic party needs a wise elderly to unify and to lead.

Most qualified

Your father's experience, character, wisdom, reputation, and leadership make him the most qualified person for the job of president. A lot of people we can't stand Trump anymore.

Trump, despite of his age, still acts like a kid and he is so “blind” (arrogant + ignorant). Shut down the government for his border wall is merely one example of his backward thinking and immaturity. **Constructing a border wall is worse than throwing money down the drain.** Besides this border wall proposal, if you count this wall as an “infrastructure”, I don't see how he is helping this country updating our **infrastructure**.

Yes, illegal immigration, and even loop-holes within legal immigration process, should be addressed, but we need someone who can **address these issues** smartly and practically. **Immigration reform is not a showmanship of photogenic walls**, especially in today's digital world, with sophisticated transportation and communication tools, it does not require people to jump over a wall to commit crime, and when **conmen could enter this country legally to defraud our community resource, they don't need to jump over a border fence.** The Chinese spent more than a hundred years to build and upgrade their **Great Wall** to keep out “barbarians”, but how come China was ruled then colonized by “barbarians” for over 500 years (Mongolians, Manchurians, Europeans, Japanese, etc.) and the wall didn't stop various small to large scale invasions by “barbarians” throughout Chinese history? USSR built **Berlin Wall**, but what happened to the Berlin Wall and to USSR in less than three decades since the wall construction?

Trump is not focusing on the right issue and not using the right approach. His inefficient and ineffective way of doing things can lead this country onto the wrong path.

With age, comes wisdom

Frankly, before I thought age is a big obstacle against Uncle Joe, but not anymore. Hey, if **Trump** is running at his age, why not Uncle Joe? **Winston Churchill was already 77** when he started his **second term PM**. Further, Mahathir—whom I and Asians respect highly but thought that he is too old—was **sworn into office at the age of 92** (surprise to many people)! Now I understand age is just another superficial factor (like appearance, skin color, and gender) that doesn't mean anything. What matters the most is what you can do for your country and for your people.

Take **Malaysia Prime Minister, Mahathir bin Mohamad** as an example, at the age of 92, I have more respect to him than if he were a younger president. At his age, he is entitled to choose an easy life, but thinking of what is best for his country and what he could help to make things better for his people, he made the challenging decision of running for office. Like him, Uncle Joe is the same kind of **selfless leader**.
